SUMMARY

Frontend Engineering Lead with 9+ years of experience designing, architecting, and delivering scalable enterprise web applications using React.js, TypeScript, and JavaScript. Proven expertise in Micro Frontend architecture, frontend system design, performance optimization, CI/CD automation, and leading the end-to-end delivery of high-impact products in regulated enterprise environments. Strong track record of building reusable, maintainable, and high-performance frontend solutions that enhance operational efficiency, user experience, and regulatory compliance. Passionate about continuously learning and applying emerging AI technologies, backend services, and modern cloud platforms.

KEY ACHIEVEMENTS

- Developed and delivered 15+ enterprise-grade web applications
- Led and mentored frontend engineering teams of up to 5+ developers, driving technical excellence through structured code reviews, best practices, and ensuring on-time project delivery
- Created and developed my own chatbot application - Link
- Received the Star Performer Award 2025 for outstanding project contributions in Wells Fargo

---

SKILLS

Frontend: React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, React Hooks, React Router, Context API, Redux, Redux Toolkit, Redux Thunk/Saga, TanStack React Query, Material UI, Ant Design, Bootstrap, Tailwind, Figma

Architecture & Performance: Frontend Architecture, Micro Frontend, Webpack Module Federation, NX, Design Patterns, SSR, CSR, SPA, SaaS, A11y, WCAG 2.1, CMS, Code Splitting, Lazy Loading, Tree Shaking, React Profiler, Lighthouse, SEO, Core Web Vitals

Testing and API and Security: Jest, React Testing Library, Playwright, TDD, REST APIs, GraphQL, Axios, Fetch API, JSON, Swagger UI, Postman, Authentication, Authorization, OAuth 2.0, OIDC, SSO, JWT, OWASP, XSS, CSRF, CSP

Build Tools, DevOps & Cloud: Webpack, Vite, Babel, NPM, Yarn, PnPm, Version Control, Git, GitHub, Bitbucket, GitHub Actions, Jenkins, Azure DevOps, Harness, Docker, SonarQube, CI/CD Pipeline, GCP, AWS (EC2, S3, Lambda)

Development Practices and AI Tool: Agile, Scrum, JIRA, GitHub Copilot, Claude AI, Gemini Pro.

CERTIFICATIONS

- Advanced React: Design Systems, Design Patterns, and Performance
- Micro Frontends with React: A Complete Developer's Guide
- Complete Agentic AI Bootcamp with LangGraph and LangChain

WORK EXPERIENCE

Sparsh Communications, Hyderabad, Tech Lead, Jul 2025 – Jul 2026

- Led the transformation of a legacy .NET Windows application into a responsive React web application and integrated an AI chatbot to enhance ERP user interactions.
- Gathered and analyzed client requirements to ensure alignment with business objectives and end-user needs.
- Spearheaded project implementation from scratch, enforcing agile practices and quality standards across development
- Collaborated with cross-functional teams to deliver a scalable React web application with advanced AI capabilities.
- Tech Stack: React 18, JavaScript, TypeScript, Micro Frontend,

Synechron, Bangalore, React Lead, Jul 2025 – Jul 2026

- Led the end-to-end development and technical roadmap execution of a compliance automation platform covering 300+ applications and 10+ regulatory controls
- Architected Micro Frontend solutions and developed enterprise user interfaces for streamlined compliance workflows
- Mentored 5+ junior engineers, enforcing structured code reviews that significantly decreased post-release defects and elevated overall code quality
- Recognized with the Star Performer Award (2025) for exceptional leadership, technical excellence, and significant contributions to the successful development of the Compliance Automation Platform
- Tech Stack: React 18, JavaScript, TypeScript, Redux, Micro Frontend, Frontend Architecture, Team Management

---

Persistent Systems, Bangalore, Technical Lead, Jun 2024 - Jul 2025

- Managed the migration of 5+ legacy applications to React 18, boosting application performance and maintainability
- Architected a Micro Frontend solution using Webpack Module Federation to enable modular and scalable application
- Reduced bundle size by implementing code splitting, lazy loading, advanced performance optimization techniques, ensured cross-browser compatibility, and performed end-to-end testing
- Achieved 85% unit test coverage using Jest and React Testing Library, significantly minimizing production defects and enhancing code reliability
- Tech Stack: React.js, TypeScript, Redux, Ant Design, Jest, Webpack 5 Module Federation

---

TNQ Technologies, Chennai - Senior Software Engineer, May 2022 - Jun 2024

- Created custom React hooks and optimized the API caching layer, decreasing server round trips and boosting frontend data loading performance
- Coordinated release planning by aligning cross-functional teams, achieving 90% on-time delivery
- Planned and implemented a centralized state management system, improving data consistency and developer productivity
- Tech Stack: React.js, TypeScript, Redux, React Router, RESTful API, SQL, Styled Components

---

Strive Technologies, Chennai, Senior Programmer, Jun 2019 - May 2022

- Engineered a reusable library of 5+ high-quality React components to accelerate development and ensure consistency
- Integrated 10+ REST APIs to enable seamless data flow, improving operational accuracy
- Reduced manual operational bottlenecks, streamlining end-user workflows and boosting productivity by 20%
- Tech Stack: React.js, JavaScript, React Hooks, Context API, MUI, REST APIs

---

RR Donnelley, Chennai, Software Engineer, Dec 2017 - Jun 2019

- Production support, timely resolution of live issues, and proactive incident management
- Demonstrated strong problem-solving skills by troubleshooting and resolving complex frontend issues, improving application stability and user experience
- Owned features from design through production deployment and post-release support
- Tech Stack: React.js, JavaScript, HTML5, CSS3, Bootstrap

PROJECTS

Runway Application - AIMs 360

- Converted a .NET Windows application into a React web application for AIMS 360, modernizing the ERP platform.
- Incorporated an AI chatbot to enhance user interactions and support workflows.
- Conducted requirement gathering and implemented Microsoft authentication to secure user access

Compliance Workload Management - Wells Fargo

- Designed and delivered a Compliance Workload Management system for Wells Fargo, improving oversight and adherence to regulatory compliance standards
- Streamlined user submission by designing an intuitive form for application owners to report compliance status and upload supporting evidence
- Engineered efficient workflow processes for both aligned and non-aligned applications, optimizing review and remediation cycles to boost operational efficiency
- Partnered with control operators and reviewers to define robust guidelines for evidence submission and compliance verification, enhancing process transparency and accuracy

AI-Powered Internal Assistant - Synchrony Bank

- Built an AI-powered internal assistant for Synchrony Bank, enhancing audit and compliance workflows to boost operational efficiency
- Integrated AWS Bedrock to harness generative AI and enable seamless interaction with advanced large language models
- Collaborated closely with stakeholders to gather, analyze, and refine requirements, ensuring alignment with strategic organizational goals

QBSE - Intuit

- Developed innovative features and product enhancements for the QBSE platform using React 18, improving application functionality, performance, and user experience
- Built frontend reusable components, delivering intuitive, user-centric interfaces that improved usability, accessibility, and overall user satisfaction
- Established centralized state management and integrated robust API solutions to improve data handling and ensure application reliability

---

DOMAIN

Banking, Financial Services, FinTech, Cyber Security, Publishing, Insurance and ERP

EDUCATION

Bachelor of Technology in Information Technology, Anna University, Trichy, Graduation Year: 2017
