KEY ACHIEVEMENTS

Awarded Star Performer 2025 at Synechron for leading the development of a compliance automation tool

SKILLS

- Technologies:**
- React.js,
 - JavaScript (ES6+)
 - TypeScript
 - HTML5
 - CSS3
 - Hooks
 - Virtual DOM

Frontend Lead with 8+ years of experience driving end-to-end web development and frontend excellence. Proven track record of architecting and delivering scalable, high-performance, secure web platforms from concept to production and derived UI/UX excellence and build highly scalable frontend applications. Expert in building and leading high-impact frontend teams, designing enterprise-grade UI systems, and shaping long-term architectural strategy. Recognized for mentoring engineers, influencing cross-functional stakeholders, and translating business vision into robust technical solutions and Passionate about continuous learning, innovation, and leading digital transformation at scale.

WORK EXPERIENCE

2025-06 -
Current

Engineering Lead

Synechron Technologies, Bangalore

Client: Wells Fargo

Domain: Banking, Cybersecurity

Project: Compliance Workload Management

Description: Led the end-to-end development of a compliance automation tool covering over 100 applications and more than 7 regulatory controls. Implemented rule-based workflows to automatically identify non-compliant applications and notify application owners. Designed aligned and non-aligned application workflows: Aligned—evidence submission → control operator verification → control reviewer approval → closure; non-aligned—remediation submission → verification → escalation, and tracking through resolution.

Responsibilities:

- Gathered and analyzed client requirements.
- Led project planning, execution, and delivery.
- Coordinated cross-functional teams, and drove technical decisions.
- Managed and mentored front-end developers.
- Assign tasks to developers and conduct regular code reviews.
- Handled complex API integrations and state management.
- Improved code quality using SonarQube.

- React Router
- Material-UI
- Ant Design
- UX - Figma

Basic Knowledge:

- Next.js
- Python

State Management:

- Redux
- Redux Toolkit
- Redux Thunk
- Context API.

APIs & Database:

- RESTful APIs
- GraphQL
- Swagger UI
- SQL
- MySQL Workbench

Unit Testing:

- Jest
- React Testing Library

Build & Deployment &

Cloud:

- Npm
- Webpack
- Babel
- Vite
- Micro-Frontend Architecture
- CI/CD
- GitHub Actions
- AWS
- Docker
- Harness

Version Control:

- Git
- GitHub

Tools & Platforms:

- VS Code

2024-06 -
2025-07

- Monitored deployments and CI/CD pipelines to ensure UI stability.
- Conducted thorough risk assessments for complex engineering projects, minimizing potential hazards while maximizing resource utilization.

Engineering Lead

Persistent Systems, Bangalore

Client: Intuit

Domain: Banking.

Led the modernization and migration of legacy applications to the latest React versions.

Spearheaded frontend architecture for high-performance React applications, including authentication, authorization, and micro-frontend implementation.

Responsibilities:

- Collaborated with clients for requirement gathering and solution design.
- Led the modernization of legacy React applications using modern React and Redux patterns.
- Mentored junior engineers, and improved code quality through structured reviews.
- Developed performance-optimized front-end code.
- Ensured production stability and zero regressions during releases.

2022-05 -
2024-06

Senior Software Engineer

TNQ Technologies, Chennai

Developed a new web-based internal production support application to replace Microsoft Word for document editing. Designed dynamic forms and feature-rich workflows using modern React.

Responsibilities:

- Designed and maintained centralized state management.
- Created custom React hooks and handled API integrations.
- Built reusable UI components, and integrated REST APIs.

- Postman
- Firebase
- Lighthouse
- SonarQube

Methodologies & Project Tracking:

- Agile
- Scrum
- SDLC
- Waterfall
- Jira
- Azure DevOps.

DOMAIN

- Banking
- Fintech
- Finance
- Publishing
- Insurance.

TEAM MANAGEMENT

- Front-End Architecture Design
- Project Planning & Execution
- Cross-functional Team Coordination
- End-to-End Project Delivery

CERTIFICATIONS

- Advanced React,
- Agentic AI

EDUCATION

B.Tech.
Information Technology,
Anna University - Trichy
(2013-17)

2019-06 -
2022-05

- Collaborated with production support teams to resolve critical issues.
- Managed code deployment across multiple environments.
- Enhanced software functionality by identifying and resolving complex technical issues.

Senior Software Programmer

SPS, Chennai

Developed and maintained web-based React applications with a focus on performance, usability, and automation to reduce manual effort, and improve client productivity.

Responsibilities:

- Developed and maintained React-based frontend applications using modern JavaScript and JSX.
- Built reusable UI components and implemented client-driven features.
- Improved application performance, accessibility, and cross-browser compatibility.
- Integrated front-end applications with REST APIs.
- Collaborated with backend, QA, and support teams for smooth delivery.

2017-12 -
2019-06

Software Engineer

RR Donnelley, Chennai

Worked as a frontend developer, delivering application development and production support for internal platforms, in collaboration with cross-functional teams.

Responsibilities:

- Developed and maintained front-end web applications using HTML, CSS, JavaScript, and React.
- Provided production support and resolved issues within defined SLAs.
- Fixed UI bugs, and handled minor feature enhancements.
- Improved UI responsiveness and overall user experience.
